

Customer Update Notices

Volume C1 Issue 6 March 9, 2008

- New DigiTel Version Available - "Worktype Number and File Number"

A software and documentation update, version 20.04.00 is available for DigiTel. It is available at "www.DigiTelSoftware.com" as a Full Installation (if it's not already installed) and as an Upgrade Installation (if it's already installed). A new Manual and updated Prompt Sets are also available.

The updates in this version include:

1. A new Worktype Number feature has been added to optionally prompt a user to enter a Worktype Number. Each user's dictation can now be sent to a specific destination based upon the Worktype that the user has entered, or based upon their default Worktype.
2. A new File Number feature has been added to assign an incrementing number to each dictation file. The File Number is displayed in DigiTel's Log Files and in DigiScribe's work lists
3. A new dictations counter feature has been added to display the Total Dictations and New Dictations on the Activity Monitor. These counters work similar to a car's odometer and trip-meter.
4. A new feature has been added to optionally play a tone each time a new dictation is sent.
5. Each user profile can now be assigned a Department Number. The Department Number is displayed in DigiTel's Log Files and in DigiScribe's work lists.
6. The CPC-Pulse Voltage Threshold that indicates to DigiTel that the calling party has hung up has been increased slightly to enhance compatibility with certain phone system extension lines.
7. The Login, Enter Worktype, and Enter Reference prompt timeouts have been extended to accommodate longer custom prompts.
