

## - **New DigiScribe Version** - “Import or Stream Work”

### **A new DigiScribe Software Version is now available!**

DigiScribe version 22.03.00 is now available at [www.DigiTelSoftware.com](http://www.DigiTelSoftware.com) as an Upgrade and as a Full Installation package. Upgrading to this new version is optional. It provides new features and additional support of playback of video files. A new User Manual and Quick Start Guide are also available there.

If you are already using DigiScribe with video files, or are planning to, you should re-install this new version to take advantage of its ability to play more types of video files. Installing “Windows Media Format Runtime” and “DirectX Runtime” files, available at [www.Microsoft.com](http://www.Microsoft.com), also helps support the playback of some video file types by installing additional video codecs.

New features include the addition of an Import feature. Import lets you easily browse to and import work from external media, including handheld recorders. The Browse feature, now called the Stream feature also lets you easily browse to work to stream its playback directly from the media.

Other new features include the display of the “Current Position in the File” and the “Total File Length” at the top of the mini-player and in Windows Task Bar at the bottom of the screen.

DigiScribe now also works with the newly released Infinity IN-USB2 Foot Pedal, beside the industry standard IN-USB1. The IN-USB2 is an IN-USB1 with a sleeker appearance.

To upgrade your DigiScribe, go to [www.DigiTelSoftware.com](http://www.DigiTelSoftware.com), click on the SOFTWARE link, locate the Software Upgrades section, and then click on this new version of DigiScribe. Then follow the on-screen instructions. If you would like assistance with the upgrade, please contact your DigiTel/DigiScribe reseller. You may also email [Info@DigiTelSoftware.com](mailto:Info@DigiTelSoftware.com).

**Plays more Video Files**

**Import Work from Media**
