

Customer Update Notice

Volume C3 Issue 4 April 13, 2010

**New Version of
- FtpMagic -
Now with 300 Site/Folder Capacity !**

A new FtpMagic Software Version is available!

FtpMagic can now upload files to up to 300 FTP Sites or Folders.

FtpMagic Version 21.01.01 is compatible with all versions of Windows.

Its major new feature is the expansion of the Site Settings from 25 to 300!

This ability to monitor up to 300 (local or network) folders and to upload the contents of those folders to up to 300 different FTP Sites or FTP Folders, opens up the option to send each person's dictation files to their own FTP subfolder, if so desired.

Many additional improvements are incorporated into this new version too, including a refined menu layout to make it easier to configure. Also, the site sequencing has been sped-up, the backups can be kept as long as 999 days now (up from 99 days), a 5 second startup delay has been added to allow entry into the Toolbox before uploads begin, server names can be longer and more descriptive now, and an option to automatically create new Upload and Backup paths has been added.

And our FTP Folders are still available for rental at only \$10 per month!
We take the headache out of setting up and maintaining reliable FTP Folders by doing the hard work for you.

If you need one or more FTP Folders, in minutes we will supply you with the log-in credentials that you'll need to access your folders. With FTP Folders, you can send dictations to remote transcriptionists, or send typed work to your clients. Use FtpMagic to automatically upload files to your FTP folders, and use DigiScribe to speed the download of files from your FTP folders. You can also use Filezilla to manually access your FTP folders, if you wish.

***If you need help upgrading your FtpMagic,
or have FTP related questions, just let us know !***

 **Windows**
Compatible with all versions, 32-Bit and 64-Bit /
Windows 7, Vista, XP, 2000, Server 2003 and 2008

DigiTel... the best call-in dictation system on the planet !
