

***DigiTel is affordable, easy to use, and will help you get more done in less time!***

- Staff members call DigiTel, enter their ID, and start dictating.
- Up to 4 users can dictate at the same time.
- Users can indicate PRIORITY work, record, pause, play back, & much more via touch-tones.
- The instant the user completes a dictation, it is available for you to type.
- DigiScribe runs on your pc to play back the dictations using foot pedal control.
- DigiTel runs in the background on your pc to answer the user's call and record dictations.
- Designed by dictation experts who care about your success.

Imagine every staff member calling in dictation from **ANY** phone, with their dictations **INSTANTLY** sent to you!

DigiTel makes this a reality! It gives you **FASTER** document turn-around, **QUICKER** access to Priority work, and **FLEXIBLE** access to your workload!

**DigiTel** — “Academic Transcription Made *Easy*” from Apptec Corporation (*developers of next generation digital dictation systems for over 17 years*) makes your job of transcribing documents and reports **faster**, and makes each staff member's job of dictating **easier**.

Now the staff can **instantly send** you dictations from the office, classroom, or while traveling.

And now you can **instantly retrieve** their dictations from any pc that is connected to the web.

**DigiTel installs in minutes and is easy to use...** we'll even install it for you and teach you how to use it, for free!

**With DigiTel**

- **Reduce document turnaround time** now that your work is delivered directly to you, and is available the instant the dictation has been completed. No more tapes to collect!
- **Find urgent work quickly** now that you can see which dictation is a Priority, who dictated and when, and much more.
- **Improve your flexibility** now that you can retrieve your work from your home pc as easily as from your office pc, or while traveling from any pc that is connected to the web.

**Let us show you how with a live demo right on your pc !**
